

SYSTEXX GLASS FIBER WALL COVERINGS FOR CORPORATE SPACES

# OFFICE AND CORPORATE SPACE SOLUTIONS

**SYSTEXX**!  
by Vitrolan

INNOVATIVE GLASS FABRIC FOR WALLS AND CEILINGS

FUNCTIONALITY AND DESIGN IN PERFECT HARMONY

# CHALLENGES IN CORPORATE SPACES

Corporate environments pose diverse and demanding requirements in terms of room design and functionality. Whether offices, conference rooms, reception areas or communal workspaces – they all have specific requirements when it comes to walls and ceilings and therefore also for the wall coverings and coatings used.

Offices need inspiring designs and calming colors to boost creativity and concentration, conference rooms should be professional and stimulating, and reception areas are the “business card”, communicating corporate and brand identity.

All in all, the walls of a company play an important role in fulfilling the various requirements of the rooms. In addition to lending them an aesthetic touch, they are key to creating a productive, professional, and pleasant working ambiance.

## SPECIAL REQUIREMENTS – SPECIAL SOLUTIONS

## SYSTEXX IN OFFICE &amp; CORPORATE SPACES

The high-quality SYSTEXX glass fiber wall coverings offer myriad benefits for corporate spaces. Tightly interwoven glass yarn helps **bridge cracks and reinforce walls** while protecting them against **abrasion and knocks**. Natural raw materials not only make them particularly **sustainable**, but also **non-toxic** and hence **ideal for allergy sufferers**.

SYSTEXX wall coverings can be repainted several times, thus considerably extending refurbishment intervals.

In addition to the fundamental technical benefits of glass fabrics and fleeces, the

SYSTEXX range also offers a number of special solutions, such as the A2 fire-rated

**SYSTEXX Active FireProtect** system or **SYSTEXX Active AcousTherm** that helps improve room acoustics.

**SYSTEXX Phantasy and Pure** boast an extensive design range and are delightfully easy to handle thanks to Aqua Technology.

## TECHNICAL HIGHLIGHTS

Resistant to disinfectants and cleaning agents

Non-toxic and food-safe

Suitable for allergy sufferers

Reaction-to-fire: B-s1, d0 – extremely flame retardant

Impact and perforation resistant

Abrasion and scrub resistant

Wall reinforcing and crack bridging

Made in Germany

Multiple repainting possible

Non-hazardous to health

The characteristics listed here apply to most of our SYSTEXX by Vitruvian range and sometimes depend on the coating.

The following pages provide an overview of SYSTEXX products tailored to meet the requirements of corporate spaces.

SYSTEXX PHANTASY AND PURE

## FUNCTIONAL AND ATTRACTIVE

Manufactured from glass – a natural raw material, **SYSTEXX Phantasy and Pure** wall coverings are eco-friendly, vapor permeable and non-hazardous to health.

At the same time, they are extremely robust and ideal for protecting crack-prone walls. Thanks to their inherent properties, glass fabrics are easy to clean and keep clean. Coated with a suitable paint, the glass fabrics of the **SYSTEXX Phantasy** and **SYSTEXX Pure** ranges can also be wiped with strong cleaning agents without being damaged.

The visual appearance is by no means neglected: from purist smooth, seamless surfaces and classic weave textures to large-scale, opulent patterns, they offer the perfect design for every taste and application area.

**SYSTEXX Phantasy and Pure** glass fabrics come with **Aqua Technology** for quick and clean installation. Like postage stamps, these coverings feature an adhesive that is already applied to the back and can be activated by just adding water.

SYSTEXX ACTIVE FIREPROTECT

# NON-FLAMMABLE WALL COVERING SYSTEM FOR INNOVATIVE FIRE PROTECTION

Of course, we hope that fire never breaks out. But what if it does due to a technical fault or carelessness? In that case, every second that a product hampers the spread of fire counts towards saving one's own life or the lives of others. Because it is not only the fire that is dangerous – but above all the rapidly spreading smoke, which causes a loss of orientation and uses up the remaining oxygen. Heavily frequented facilities in particular must provide adequate protection to allow sufficient time for evacuation in the event of fire. Systems such as **SYSTEXX Active FireProtect**, which offer the highest fire resistance classes, can then add crucial minutes to the time available for escape.

**SYSTEXX Active FireProtect** is A2-s1, d0 fire rated which means.

- A2 – it is non-combustible,
- s1 – in the event of fire, there is little or no smoke propagation and
- d0 – in the event of fire, there are no flaming droplets

SYSTEXX ACTIVE MAGNETIC AND MAGNETIC WHITEBOARD

## SPACE FOR CREATIVE IDEAS

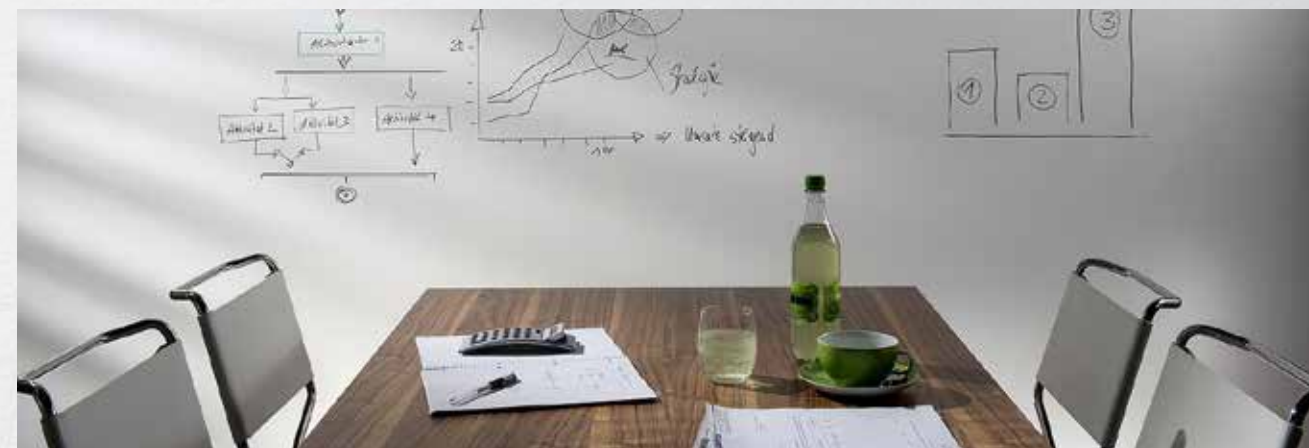

Whether used as information board, presentation surface, or for posting notes: with the **SYSTEXX Active Magnetic** range, you no longer have to make do with unwieldy flipcharts, bulletin boards, or framed whiteboards. No matter the shape or size of the interactive surfaces, our magnetic products are easy to install. The reverse side of the wallpaper has a magnetic layer, whereas the options for the visible side are a particularly fine glass fabric (**Magnetic M39**) or a perfectly smooth glass fleece (**Magnetic M22**). The wall coverings, which can be repainted multiple times, blend almost imperceptibly into the room and do not create a magnetic field or interfere with mobile radio or Wi-Fi networks.

With our **SYSTEXX Active Magnetic Whiteboard** it is possible to hang an even more intelligent multifunctional surface in next to no time. No magnetic paint or plates, no separate coat of paint – a whiteboard has never been put on a wall faster or cleaner!

SYSTEXX ACTIVE LOGO

## AS UNIQUE AS YOUR COMPANY

**SYSTEXX Active Logo** is ideal for companies where corporate identity plays an important role but it also serves as a unique eye-catcher in rooms. Use the wall as your business card to communicate your corporate identity!

Using computer-controlled Jacquard weaving techniques, custom logos and prints can be woven into the wall covering and create a perfect setting for the corporate design elements.

The basic fabric is available in two different variants: a nearly smooth, extremely fine fabric (**SYSTEXX Active Logo L65**) and an intentionally textured version (**SYSTEXX Active Logo L00**). We are happy to help you with choosing the fabric that best accentuates your design.

SYSTEXX ACTIVE ACOUSTHERM

## REDUCES NOISE, SAVES ENERGY

Whether or not we feel comfortable in a particular room or situation depends on a number of different factors. **Temperature and noise** are particularly important. A balanced indoor climate and optimum acoustics have a positive impact on our performance and on our ability to concentrate.

To fulfill their individual purpose, rooms must have the right acoustic balance. The noise level in open-plan offices is different from that in libraries and conference rooms where people in the back rows should ideally be able to hear what's going on.

**SYSTEXX Active AcousTherm** features a specially designed fleece on the back of the glass fabric which traps air inside the wall covering. In turn, this noticeably reduces reverberation in the room while improving its acoustics – the wall covering is E-rated for sound absorption.

**SYSTEXX Active AcousTherm** also reduces heat loss through walls by 10% thanks to the trapped air. A comfortable temperature can be reached up to four times faster with **AcousTherm**. Thus, the desired cozy warmth is achieved much more quickly, resulting in a relative saving of 2 °C.

The Vitrulan Group has production facilities at three locations in Germany: Marktschorgast, Haselbach (Sonneberg), and Brattendorf (Hildburghausen) as well as one in Mikkeli, Finland.

Wall coverings made of glass fabrics and glass fleeces, modern infrared surface heating based on glass fabrics, and technical textiles made of glass, synthetic, and carbon fibers make up the core products of the Vitrulan Group.

Vitrulan produces extremely robust, hard-wearing, sustainable, and versatile wall coverings. A wide range of traditional and modern designs are complemented by innovative wall coverings with additional functions. Sustainable interior design and premium product quality together are our number one priority.
