

SYSTEXX GLASS FIBER WALL COVERINGS IN THE HOSPITALITY SECTOR

SOLUTIONS FOR HOTELS AND RESTAURANTS

SYSTEXX 
by Vitrolan

INNOVATIVE GLASS FABRIC FOR WALLS AND CEILINGS

PLEASANT ATMOSPHERE, HYGIENE AND EXTREME WEAR AND TEAR

CHALLENGES IN THE HOSPITALITY INDUSTRY

→ In hotels, restaurants and cafes, spaces and areas have to meet a triad of requirements. The focus is on the guest experience: ensuring they feel comfortable, enjoy the atmosphere and vibes of the restaurant or hotel room, feel invited and welcome. At the same time, it is essential for all restaurants – from takeaways to haute cuisine – to provide a high level of hygiene and cleanliness throughout the premises, especially in kitchens and sanitary areas. And last but not least, high visitor traffic exposes the walls to constant wear and tear – be it by suitcases that knock against the lobby corner during check-in, or by chairs that repeatedly scrape along walls.

SPECIAL REQUIREMENTS - SPECIAL SOLUTIONS

SYSTEXX IN HOSPITALITY SETTINGS

In the hospitality industry, it is always important to meet the highest standards in terms of both hygiene and atmosphere. Glass fiber wall coverings provide the perfect basis for this. From a purist, smooth look to large-format ornamental patterns, a wide range of designs enables the implementation of any space concept, ensuring the rooms can be given the desired atmosphere. Keeping the walls perfectly clean is easy thanks to the raw material used – glass; in combination with a suitable coating system, they withstand even the strongest disinfectants and cleaning agents.

They **bridge cracks and reinforce walls** thanks to tightly interwoven glass yarn that also provides protection against **abrasion and knocks**. SYSTEXX glass fabrics can be **repainted several times**, thus considerably extending refurbishment intervals compared with standard wallpaper. Natural raw materials not only make them particularly **sustainable**, but also **non-toxic** and **suitable for allergy sufferers**.

TECHNICAL HIGHLIGHTS

Resistant to disinfectants and cleaning agents

Abrasion and scrub resistant

Non-toxic and food-safe

Water vapor permeable

Reaction-to-fire: B-s1, d0 / A2-s1, d0

Suitable for allergy sufferers

Wall reinforcing and crack bridging

Made in Germany

Impact and perforation resistant

Non-hazardous to health

The properties mentioned here apply to a large part of the SYSTEXX by Vitruvan range and may vary subject to the relevant coating.

The following pages provide an overview of SYSTEXX products tailored to meet the requirements of the hospitality industry.

SYSTEXX PHANTASY

WORLDS OF FANTASTIC DESIGNS

Whatever the setting, deepest jungle or vast, barren desert landscape: **SYSTEXX Phantasy** takes you on a journey into fantastic worlds. Opulent designs and stunning, large-format patterns turn entire rooms or feature walls into the focal point of any café, meeting or hotel room. Liven up your walls and let your imagination run free.

Many of our **SYSTEXX Phantasy** glass fabrics are available with **Aqua Technology** for quick and clean installation. Like postage stamps, these coverings feature an adhesive that is already applied to the back and can be activated by just adding water.

SYSTEXX PURE AND FLEECE

LESS IS MORE

SYSTEXX Pure offers boundless scope for creativity. Straight lines and well-defined textures create a calm setting and deliberately enhance the purist look of your walls. In addition, this pared down look also provides the ideal basis for sophisticated stucco techniques or color combinations. All wall coverings included in the **SYSTEXX Pure** range offer the same technical benefits as glass fiber wall coverings: they are crack bridging and wall reinforcing, impact resistant, fire-resistant and non-hazardous to health.

For lovers of perfectly smooth surfaces, the **SYSTEXX Fleece** range offers a large selection of different glass and cellulose fleeces.

Just like SYSTEXX Phantasy, many of our **SYSTEXX** products can be supplied with our time and cost-saving **Aqua Technology** adhesive coating.

SYSTEXX ACTIVE RENO: WHEN YOU NEED A FLAWLESS FINISH FAST

RENOVATING WALLS IN RECORD TIME

SYSTEXX Active Reno is a glass fabric with a special weave pattern that hides substrate imperfections. Its intentionally irregular, textured finish is particularly suitable for direct application over old wall coverings on areas in need of renovation, e.g. textured plaster up to 2 mm or old glass fabric. **SYSTEXX Active Reno** products were developed specifically for quick renovation in many indoor areas.

The irregular weave pattern hides substrate imperfections.

SYSTEXX ACTIVE FIREPROTECT

NON-FLAMMABLE WALL COVERING SYSTEM FOR INNOVATIVE FIRE PROTECTION

Of course, we hope that fire never breaks out. But what if it does due to a technical fault or carelessness? In that case, every second that a product hampers the spread of fire counts towards saving one's own life or the lives of others. Because it is not only the fire that is dangerous – but above all the rapidly spreading smoke, which causes a loss of orientation and uses up the remaining oxygen. Heavily frequented facilities in particular must provide adequate protection to allow sufficient time for evacuation in the event of fire. Systems such as **SYSTEXX Active FireProtect**, which offer the highest fire resistance classes, can then add crucial minutes to the time available for escape.

SYSTEXX Active FireProtect is A2-s1, d0 fire rated which means

- A2 – it is non-combustible,
- s1 – in the event of fire, little or no smoke propagation and
- d0 – in the event of fire, there are no flaming droplets

IDEAL FOR...

Paths of travel and exit routes

Restaurants and guest lounges

SYSTEXX ACTIVE MAGNETIC AND MAGNETIC WHITEBOARD

DISPLAY BOARDS IN ALL FORMATS

Whether they are for duty or menu planning, or to provide information for your guests: with the **SYSTEXX Active Magnetic** range, you no longer have to make do with unwieldy flipcharts or old bulletin boards. Whatever the shape or size of the interactive surfaces, they can be easily installed with our magnetic products. The reverse side of the wall covering has a magnetic layer, whereas the options for the visible side are a particularly fine glass fabric (**Magnetic 139 PG**) or a perfectly smooth glass fleece (**Magnetic Fleece 200 PG**). The wall coverings, which can be painted over repeatedly, blend almost imperceptibly into the room and do not create a magnetic field or interfere with mobile radio or Wi-Fi networks.

With our new **SYSTEXX Active Magnetic Whiteboard** it is possible to hang an even more intelligent multifunctional surface in next to no time. No magnetic paint or plates, no separate coat of paint – a whiteboard has never been put on a wall faster or cleaner!

IDEAL FOR...

Offices and working spaces

Traffic areas with display boards

Reception areas

vitruvan.com

The Vitruan Group has production facilities at two locations in Germany: Marktschorgast (Kulmbach) and Haselbach (Sonneberg) as well as one in Mikkeli, Finland.

Wall coverings made of glass fabrics and glass fleeces, modern infrared surface heating based on glass fabrics, and technical textiles made of glass, synthetic, and carbon fibers make up the core products of the Vitruan Group.

Vitruan produces extremely robust, hard-wearing, sustainable, and versatile wall coverings. A wide range of traditional and modern designs are complemented by innovative wall coverings with additional functions. Sustainable interior design and premium product quality together are our number one priority.
