

SYSTEXX RENO SMOOTH PG AQ

BENEFITS AT A GLANCE

- | **Quick** and **efficient installation** thanks to Aqua Technology
- | Conceals surface irregularities of up to **1 mm**
- | Easy to apply over existing glass fiber wallcoverings
- | No messy filling and sanding necessary
- | Extremely **time- and money-saving**
- | **So easy** to handle, cut, and install, just like other SYSTEXX glass fleece products with Aqua Technology
- | Abrasion- and scrub-resistant
- | **Mechanical durability** significantly greater than conventionally renovated wall surfaces
- | Resistant to disinfectants and cleaning agents (when used with compatible coating systems)
- | Water vapor permeable
- | **Suitable for allergy sufferers**

The Vitrulan Group has production facilities at two locations in Germany: Marktschorgast (Kulmbach) and Haselbach (Sonneberg) as well as one in Mikkeli, Finland.

Wall coverings made of glass fabrics and glass fleeces, modern infrared surface heating based on glass fabrics, and technical textiles made of glass, synthetic, and carbon fibers make up the core products of the Vitrulan Group.

Vitrulan produces extremely robust, hard-wearing, sustainable, and versatile wall coverings. A wide range of traditional and modern designs are complemented by innovative wall coverings with additional functions. Sustainable interior design and premium product quality together are our number one priority.

PERFECT FOR CONTRACTORS AND BUILDING OWNERS

SYSTEXX ACTIVE RENO SMOOTH

SYSTEXX Active Reno products are specifically designed to make interior renovation projects of all kinds faster and more efficient. They help reduce project time and minimize downtime, which means offices, hotels, and public buildings can remain operational throughout the renovation process.

SYSTEXX Active Reno Smooth PG AQ offers a completely new solution for creating perfectly smooth walls. Our premium glass fleece features Aqua Technology, so it comes with a pre-applied adhesive coating on the back that is activated simply by adding water. The result is faster, cleaner, and more efficient installation.

The new **adhesive coating, developed exclusively for Reno Smooth**, levels surface irregularities of **up to approximately 1 mm**, creating a smooth, seamless finish. It is the ideal solution for renovating existing glass fabric wallcoverings without the time-consuming filling and sanding typically required for substrate preparation. This saves time, reduces mess, and significantly speeds up the entire renovation process. Installers also appreciate the excellent cutability and skin-friendly handling of the soft, flexible glass fleece. Once installed, **Reno Smooth** is ready for painting. Additional wallpaper can be applied if desired, but it is **not necessary**.

Another key advantage becomes evident in everyday use: **SYSTEXX Active Reno Smooth** delivers the same **exceptional mechanical durability** as other SYSTEXX glass fleece products. Compared to skim-coated wall surfaces, it offers much greater resistance to everyday wear and tear. This makes **Reno Smooth** an excellent choice for high-traffic environments where attractive, robust wall finishes are essential.

Roll length: 50 m; width: 1 m

A REAL TIME-SAVING ADVANTAGE

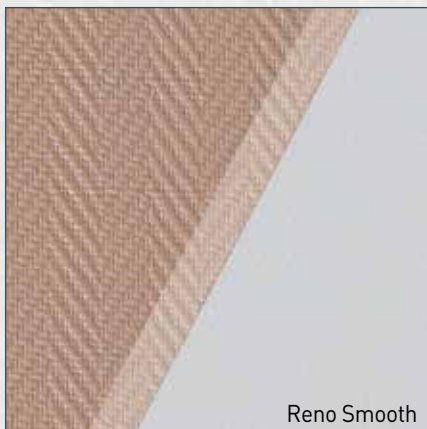

QUICK TO APPLY

Transform fish-bone glass fabric into a perfectly smooth wall without any time-consuming filling and sanding. Here's a comparison:

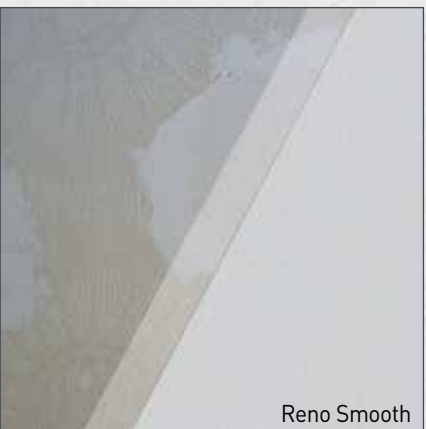

IMPRESSIVELY SIMPLE

WALLPAPERING WITHOUT FILLING

Old glass fibre wall covering:
Prime and re-wallpaper.

Unevenness (up to 1 mm):
Prime and re-wallpaper.

THE RESULTS SPEAK FOR THEMSELVES

CONFIRMED IN PRACTICAL TESTING

SYSTEXX Active Reno Smooth demonstrates its superior performance when tested:
SYSTEXX Active Reno Smooth produced a texture-free surface finish with just one application of the wallcovering and a single coat of paint. Fabric texture and seams remained visible with the rival product.
